Introduction

Many employers in the province do not have the expertise or resources to conduct industrial hygiene assessments. Therefore, they look to private consultants to provide this service. In response to queries from employers, WorkplaceNL has developed this Directory of Industrial Hygiene Service Providers.

Choosing a service provider

The consultants listed in this document have requested to be listed herein as offering the described services. Any description, contact information or titles have been provided to WorkplaceNL by the consultants themselves.

This is not an all-inclusive list of industrial hygiene service providers. It is understood that WorkplaceNL does not endorse or support any of these businesses, nor does it take responsibility for the quality of service which they provide. Therefore, it is strongly recommended that anyone seeking consultation services from businesses listed in the directory follow the recommendations made in this document.

Know what services you require

Be well informed about which specific service you require before asking a consultant to provide you with an estimate of cost for service. Describe the issue in detail in order for the provider to clearly understand the services that you need.

Consider the following questions:

- What type of information will the assessment provide?
- What is the typical duration of the assessment?
- Are there any documents that you will need to supply (process descriptions, safety data sheets, ventilation plans, etc.)?
- What type of report you can expect to receive?
- Will the report include recommendations for controlling identified hazards?
- Is it likely that follow-up services will be required?
- Are there any limitations to the assessment you should be aware of?
- How long after the assessment is completed will you receive a report of the findings?

If you have been directed by the Occupational Health and Safety Division of Service NL to obtain industrial hygiene services, you may wish to consider providing the service provider with the text contained in the “To Wit” section of your written directives. This will help the consultant understand what is required. You may also need to provide them with the due date required by the order, so they can advise you if it is possible for them to provide you with a report by the required date.

Ask for a quote (cost estimate)

When contracting a service provider it is a good idea to get several quotes, so that you can compare pricing.

When asking for a quote ensure that it is in writing and that it outlines in detail what services are being provided (i.e. travel, lodging, site time, laboratory analysis, report-writing, etc.), as well as, how long the estimate is valid. It is also advisable to ask if the estimate will include follow-up services.

Determine the qualifications of the consultant

Industrial hygiene service providers may vary in their qualifications. Many qualifications may be specific to an individual worker at that location and not necessarily to the consulting firm.

Consider asking the following questions:

- What are the qualifications (education and training) of the assessor?
- Do they hold any professional certifications?
- Have they done similar work in the past?

Below are some examples of professional certifications:

- Industrial Hygienists
 - Certified industrial hygienist (CIH)
 - Registered occupational hygienist (ROH)
 - Registered occupational hygiene technician (ROHT)
- Radon Specialists
 - Canadian National Radon Proficiency Program (C-NRPP), Measurement
 - Canadian National Radon Proficiency Program (C-NRPP), Mitigation
- Asbestos Air Sample Laboratory
 - Registration with a quality control program, such as IRRST

Information for service providers

How a service provider can be included in this directory

To add your business to this directory, please complete the [Directory of Industrial Hygiene Service Providers Application Form](#).

WorkplaceNL contact information

For more information about Prevention Services please visit our website at workplacenl.ca

Updating a service provider's information in this directory

It is the responsibility of each service provider to ensure that their information in this directory is current. Please notify WorkplaceNL when revisions are required to the staff listing, location, or services.

Attention: Industrial Hygienist
