# **Instructions for Completing** Chiropractor's Report 8/10c

This is a multipurpose form used for Initial, Progress, Extension and Discharge Reports. Indicate the report type by ticking the appropriate box in the top right hand corner of the form.

# A Chiropractor would complete this report for:

- 1. New Injuries The chiropractor or worker believes the injury is work-related.
- Recurrences The injury may be a recurrence of a previous work-related injury.
- 3. Progress reporting When there is a significant change in the worker's: (1) condition; (2) treatment; or (3) return-to-work status.
- 4. Extension requests When the chiropractor is requesting an extension of treatments.
- Discharge Reports When the patient is being discharged.

# On the day of the visit:

Provide the employer's copy of the form 8/10c to the injured worker, who will then give it to the employer. Only sections outlined in red are visible on the employer's copy.

# Complete and legible reporting:

- Reporting fees will not be paid for incomplete or illegible reports.
- Please do not use a stamp for any information including chiropractor's name, contact information or billing number. Stamps are not permitted as this is a triplicate form. Information provided by stamp will not be visible on the worker and employer copies of the form. Forms using stamps will be considered illegible.

# Section B - Specific Information for Parts of Body Injured:

- It is not necessary to provide the Mechanism of Injury information on reports subsequent to the initial report unless there is a change in the information provided or additional information is available.
- Coding is used in this section as outlined on the reverse of this sheet. Only one code box should be used for each code entered, regardless if the code has one or two digits (see example below).
- First, enter codes for Part(s) of Body and whether the injury pertains to the Left, Right or Center of the specified body part(s), if applicable. If the code for the Part of Body is not on the code sheet, enter the code for Other and identify the specific body part in the space below the code.
- If you are the primary health care provider, you must provide documentation of all injured parts of body, even if you are not providing chiropractic treatment for all injured parts of body.
- For each Part of Body, enter coding, as applicable, for: Subjective Reports, Objective Findings, Diagnoses, Treatments, Investigations\*, and Assistive Devices\*. When outlining the Examination and Treatment Plan, including all applicable codes is important.
- If the Subjective Report, Objective Finding, Diagnosis, Treatment, Investigation and/or Assistive Device is not included on the code sheet, enter the code for Other. When using Other codes, also enter the Other code number and provide details for that code in the Additional Comments box (box 10).
- The *Update Status* boxes are used when completing progress, extension or discharge reports. They are intended to provide updates on Subjective Reports and Objective Findings from the previous visit. The Update Status is not required for initial reports of injury.

The Investigations category is only intended for referrals being made at the time of this visit. Recommendations for assistive devices may also require completion of a Health Care Devices and Supplies Prescription form.

# **Supporting Information**

Employers and workers are obligated under the *Workplace Health, Safety and Compensation Act* to co-operate in the worker's early and safe return to suitable and available employment with the injury employer. This may involve modified work, ease back to regular work, transfer to an alternate job, or trial work to assess the worker's capability.

The worker is responsible for providing the employer's copy of the form 8/10c, chiropractor's report, to the employer by the next working day following the chiropractor's visit. If a worker cannot provide the form in person, he/she must contact the employer and provide the information by telephone, e-mail or fax.

### Worker co-operation:

- contact the injury employer as soon as possible after the injury occurs and maintain effective communication throughout the period of recovery or impairment;
- (ii) assist the employer, as may be required or requested, to identify suitable and available employment;
- (iii) accept suitable employment when identified; and
- (iv) give WorkplaceNL any information requested concerning the return-to-work plan, including information about any disputes or disagreements which arise during the early and safe return-to-work process.

### **Employer co-operation:**

- (i) contact the worker as soon as possible after the injury occurs and maintain effective communication throughout the period of the worker's recovery or impairment;
- provide suitable and available employment. The employer is responsible to pay the worker's salary earned during the early and safe return-to-work plan. WorkplaceNL will pay the differential, if any, between the salary earned during early and safe return-to-work plan and 85% of the worker's net pre-injury earnings subject to the maximum compensable ceiling; and
- (iii) give WorkplaceNL any information requested concerning the worker's return to work, including information about any disputes or disagreements which arise during the early and safe return-to-work process.
