

To help achieve our goals that support recovery from injury and return to work, the following metrics serve as a baseline and progress measures to monitor efforts in these areas.

*Note: Restated Average Composite Duration of Claims (Days) numbers, to meet the definition (see note 2 below) are forthcoming due to a calculation error.

Return to Work and Recovery From Injury Metrics		2017	2018	2019	2020	2021	2022
1.	Short Term Duration (Days)	40	40	45	54	50	42
2.	Average Composite Duration of Claims (Days)	129*	135*	152*	184*	198*	191*
3.	Number of Workers Involved in Initial ESRTW Program	1,918	1,976	2,123	1,686	1,979	2,116
4.	Number of Extended Earnings Loss (EEL) Claims Set Up	181	186	231	142	270	233
Return to Work Outcomes - Within 180 days (As of Dec. 31 of each respective year)							
5.	Number of Workers that Returned to Work	3,364	3,283	3,478	2,862	3,042	3,440
6.	Return to Work (RTW) Within 180 days	2,804	2,745	2,905	2,316	2,446	2,764
7.	Percentage of RTW Within 180 days	83.4%	83.6%	83.5%	80.9%	80.4%	80.3%
8.	Claim Costs Associated with RTW Within 180 days	\$8,633,885	\$8,146,583	\$8,418,663	\$6,922,587	\$7,650,274	\$ 8,753,977
9.	Average Cost per Claim Associated with RTW Within 180 days	\$3,079	\$2,968	\$2,898	\$2,989	\$3,128	\$3,167

Notes:

- Short Term Duration (Days) is defined as the average number of days for which temporary earnings loss benefits are paid for injuries occurring in the same reference year.
- As defined by the Association of Workers Compensation Boards of Canada (AWCBC), composite duration is “the estimated total number of calendar days compensated for short-term disability over the first five calendar years of a typical lost time claim (if current conditions are continued for future years). Short-term disability benefits include all income benefits during the initial period after the injury, before the injury has stabilized, plateaued or consolidated.”
- The number of workers that started an Early and Safe Return To Work (ESRTW) program for the first time.
- The number of Extended Earnings Loss (EEL) claims set up per year, represents the number of workers, regardless of when their injury occurred, who had a claim approved for EEL benefits.
- Total claim count represents the total number of workers with lost time benefits that returned to work (RTW). The number is based on claim closures. The injury may not have occurred in this year.
- Return to work within 180 days represent the total number of workers with lost time benefits that returned to work. The number is based on claim closures. The injury may not have occurred in this year.
- Percentage of RTW within 180 days is the same number as note five but expressed as a percentage. The injury may not have occurred in this year.
- Claim costs associated with RTW within 180 days is based on the total payment from the injury year up to and including the year the claim was first closed. The injury may not have occurred in this year.
