

Move Well Work Well

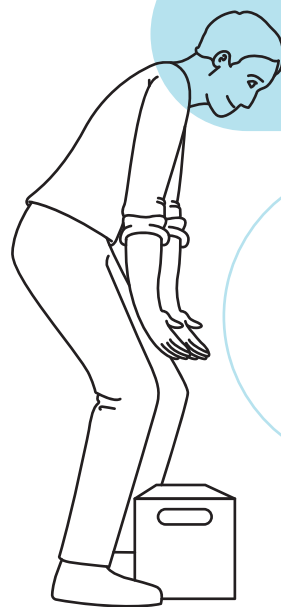

Let's prevent
back injuries

When lifting and moving objects:

Avoid bending your back. **Bend your hips and knees** instead. Hips should bend first. Think *squat back*.

QUICK TIP

1
Lower self
to object

2
Starting
position
of lift

- ✓ Wide stance
- ✓ Object between knees
- ✓ Heels on floor
- ✓ Firm core
- ✓ Back straight
- ✓ Elbows close

QUICK TIP

Avoid twisting your back. To change direction, keep nose between toes by pivoting your feet, pointing one foot in the desired direction and following with the other foot.

Stay strong. Stay safe.

Move Well Work Well

*Let's prevent
shoulder injuries*

Avoid overreaching
(working with elbows
away from body).

HOW?

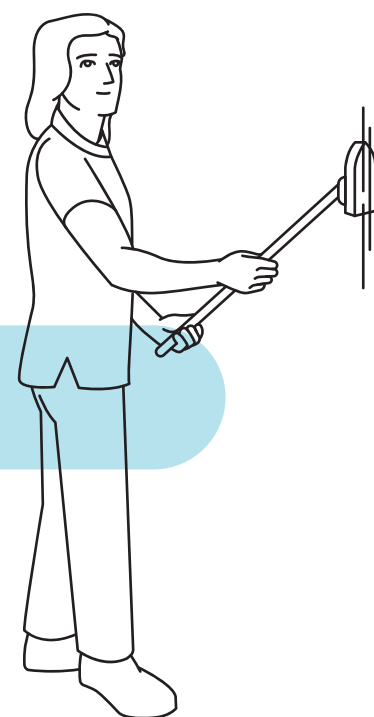

QUICK TIP

**Get closer to object or
person. Keep elbows
close to your body.**

QUICK TIP

**Use long-handled tools for overhead,
low-level and far-from-the-body work.**

Stay strong. Stay safe.

Move Well Work Well

*Let's prevent
wrist injuries*

**Give your hands and wrists
regular breaks to avoid a strain.**

HOW?

QUICK TIP

Avoid holding tools
for extended periods.
Switch hands.

QUICK TIP

Frequently **alternate between
tasks** so tired muscles can rest.

Stay strong. Stay safe.
